

**Brandes Investment Partners**  
**Asia Pacific (ex-Japan) Equity Strategy Notes**  
**First Quarter 2023 (January 1 – March 31, 2023)**

The Brandes Asia Pacific (ex-Japan) Equity Strategy returned 5.01% net of fees and 5.26% gross of fees, outperforming its benchmark, the MSCI AC Asia Pacific ex Japan Index, which was up 4.10%, as well as the MSCI AC Asia Pacific ex Japan Value Index, which returned 3.89%.

<b>Annualized total return as of March 31, 2023</b>	<b>1-year</b>	<b>5-year</b>	<b>10-year</b>
Brandes Asia Pacific (ex-Japan) Equity Composite (net)	-0.86%	-0.92%	3.96%
Brandes Asia Pacific (ex-Japan) Equity Composite (gross)	0.08%	0.02%	4.97%
MSCI AC Asia Pacific ex Japan Index	-8.91%	1.05%	3.77%

Past performance is not a guarantee of future results. One cannot invest directly in an index. Returns include reinvestment of all dividends and are reduced by any applicable foreign withholding taxes, without provisions for income taxes, if any.

**Positive Contributors**

Holdings in Taiwan drove returns, with notable contributors including information technology companies **Accton Technology**, **Wiwynn** and **Taiwan Semiconductor Manufacturing Company**. South Korea's **Samsung Electronics** and steelmaker **POSCO** also helped performance, as did China-based **Alibaba**, whose announcement of a six-way split and potential IPO (initial public offering) for each its business segments was well received by the market.

Additionally, health care and financials holdings aided returns from a relative standpoint.

**Performance Detractors**

The largest detractors included several holdings in China, namely **Chinasoft International**, **TravelSky Technology**, **China Education Group** and **Wynn Macau**.

China Education Group's share price has been weak recently due to the market's disappointment over a change in the company's chief financial officer (CFO) and a lack of progress on the M&A (mergers and acquisitions) front. We view these concerns as overblown. The company is well positioned, in our opinion, to maintain an attractive rate of organic growth, supplemented with disciplined evaluation of potential acquisition targets. With respect to the change in the executive office, the previous CFO resigned due to retirement (age 62). We continue to maintain an allocation to the company as we believe its fundamentals remain intact.

Meanwhile, Chinasoft International reported underwhelming results for the second half of 2022 as the company continued to be impacted by a weak macro environment and a slowdown at a key strategic partner, Huawei. We remain confident about the company's long-term prospects given the volume growth of outsourcing work from clients and Chinasoft's rapidly expanding cloud business.

Apart from holdings in China, notable detractors included South Korean personal care products business **LG H&H** and tobacco company **KT&G**. Additionally, India-based **Indus Towers** hurt returns as it continued to struggle with elevated accounts receivable balances, resulting primarily from a major customer's (Vodafone Idea) inability to make timely payments.

**Select Activity in the Quarter**

The emerging markets investment committee initiated a position in Indian electric utility **NTPC Limited** while divesting China-based **Weichai Power**, Singapore-based **Flex** and Taiwanese technology company **Largan Precision**.

NTPC Limited, formerly known as the National Thermal Power Corporation, is India's largest electric utility, accounting for about a quarter of the country's power generation and over 15% of its installed capacity. The Government of India holds a controlling, but declining stake in NTPC (89.5% stake at the company's 2004 IPO to currently 51.1%). Over 97% of NTPC's capacity operates under cost-of-service regulation, while the remaining installed capacity comprising renewable energy is

being developed on a competitive basis. As part of India's environmental commitment to fight global warming, NTPC plans to add 60GW of renewable energy by 2032 to reach 50% of its installed capacity.

Until recently, NTPC suffered a decade-long derating due to adverse regulatory changes and revenue shortfalls in addition to the recurrent overhang from the government gradually reducing its stake. The company also struggled with the stigma associated with its large exposure to coal-based electricity generation. In our view, one of the main uncertainties was the lack of clarity regarding the role the government envisioned for NTPC in India's decarbonization strategy. This concern has been alleviated now that it is clear NTPC will be a leading participant and possibly become the largest developer of renewable capacity in the country, and it will invest significant capital expenditure to retrofit its entire coal-based fleet under regulated returns with good visibility for cost recovery. Hence, the transition from coal to renewable energy has gone from posing a potentially existential threat for NTPC to providing a significant opportunity supporting earnings growth potential in the foreseeable future.

While these positive developments have not gone unnoticed by the market, upside potential persists as NTPC represents, in our opinion, an opportunity to invest in a "growth" utility at "value" or discounted multiples.

### **Current Positioning**

The strategy has maintained its largest country weightings in China and South Korea, as well as a material overweight to Indonesia. We have remained underweight companies in India and have no holdings in Australia or New Zealand, as has been the case for several years.

From a sector perspective, the portfolio's largest weightings remain in consumer discretionary, information technology and financials (although it is underweight relative to the MSCI AC Asia Pacific ex Japan Index). Notable underweights are in materials (which coincides with the strategy's lack of exposure to Australia), energy and industrials.

We believe the positioning of the Brandes Asia Pacific (ex-Japan) Equity Strategy bodes well for the long term.

Capital Expenditure (Capex): Capital expenditures are funds used by a company to acquire or upgrade physical assets such as property, industrial buildings or equipment. Capex is often used to undertake new projects or investments by the firm. Source: Investopedia.com

The MSCI AC Asia Pacific ex Japan Index with net dividends captures large and mid cap representation of developed and emerging markets in the Asia Pacific region, excluding Japan. Data prior to 2001 is gross dividend and linked to the net dividend returns.

The MSCI AC Asia Pacific ex Japan Value Index with gross dividends captures large and mid cap securities across developed and emerging markets in the Asia region excluding Japan. Attributes for value index construction are book value to price, 12-month forward earnings to price, and dividend yield.

The foregoing Quarterly Commentary reflects the thoughts and opinions of Brandes Investment Partners® exclusively and is subject to change without notice. The information provided in the commentary should not be considered a recommendation to purchase or sell any particular security. It should not be assumed that any security transactions, holdings or sectors discussed were or will be profitable, or that the investment recommendations or decisions we make in the future will be profitable or will equal the investment performance discussed herein. International and emerging markets investing is subject to certain risks such as currency fluctuation and social and political changes; such risks may result in greater share price volatility. There is no assurance that any securities discussed herein will remain in an account's portfolio at the time you receive this report or that the securities sold have not been repurchased. The actual characteristics with respect to any particular account will vary based on a number of factors including but not limited to: (i) the size of the account; (ii) investment restrictions applicable to the account, if any; and (iii) market exigencies at the time of investment. Unlike bonds issued or guaranteed by the U.S. government or its agencies, stocks and other bonds are not backed by the full faith and credit of the United States. Stock and bond prices will experience market fluctuations. Please note that the value of government securities and bonds in general have an inverse relationship to interest rates. Bonds carry the risk of default, or the risk that an issuer will be unable to make income or principal payment. There is no assurance that private guarantors or insurers will meet their obligations. The credit quality of the investments in the portfolio is not a guarantee of the safety or stability of the portfolio. Investments in Asset Backed and Mortgage Backed Securities include additional risks that investors should be aware of such as credit risk, prepayment risk, possible illiquidity and default, as well as increased susceptibility to adverse economic developments. Securities of small companies generally experience more volatility than mid and large sized companies. Although the statements of fact and data in this report have been obtained from, and are based upon, sources that are believed to be reliable, we cannot guarantee their accuracy, and any such information may be incomplete or condensed. Strategies discussed are subject to change at any time by the investment manager in its discretion due to market conditions or opportunities. The Brandes investment approach tends to result in portfolios that are materially different than their benchmarks with regard to characteristics such as risk, volatility, diversification, and concentration. Please note that all indices are unmanaged and are not available for direct investment. Past performance is not a guarantee of future results. No investment strategy can assure a profit or protect against loss. Market conditions may impact performance. The performance results presented were achieved in particular market conditions which may not be repeated. Moreover, the current market volatility and uncertain regulatory environment may have a negative impact on future performance. The margin of safety for any security is defined as the discount of its market price to what the firm believes is the intrinsic value of that security. The declaration and payment of shareholder dividends are solely at the discretion of the issuer and are subject to change at any time.
