

# When Value Works, Brandes Has Done Better

When value did well, Brandes tended to do even better. With over 50 years managing value strategies, we strive to deliver benchmark-beating results through our research-driven approach.

While we cannot predict performance, we are optimistic for value given the interest-rate environment and the valuation dispersion between value and growth stocks.

The information provided in this material should not be considered a recommendation to purchase or sell any particular security. It should not be assumed that any security transactions, holdings or sectors discussed were or will be profitable, or that the investment recommendations or decisions we make in the future will be profitable or will equal the investment performance discussed herein. Strategies discussed are subject to change at any time by the investment manager in its discretion due to market conditions or opportunities. The Brandes investment approach tends to result in portfolios that are materially different than their benchmarks with regard to characteristics such as risk, volatility, diversification, and concentration. International and emerging markets investing is subject to certain risks such as currency fluctuation and social and political changes; such risks may result in greater share price volatility. Diversification does not assure a profit or protect against a loss in a declining market.
