## Average Annual Total Returns (%) as of 12/31/2025

Source: Brandes, Russell. Performance data quoted, calculated in USD, represents past performance; past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance of the fund may be lower or higher than the performance quoted. Performance data current to the most recent month end may be obtained by calling 800.395.3807. Performance would have been lower without limitations in effect. It is not possible to invest directly in an index. <sup>2</sup> The performance shown for periods before January 2, 2018 is that of a private investment fund managed by the Advisor (the "Predecessor Fund") prior to the commencement of the Small Cap Fund's (the Fund) operations with policies, guidelines and restrictions that were, in all material respects, equivalent to those of the Fund. The Fund acquired the assets and assumed the liabilities of the Predecessor Fund on January 2, 2018, and investors in the Predecessor Fund received Class I shares of the Fund as part of the reorganization. Performance shown reflects the gross expenses of the Predecessor Fund.

Investment Objective: The Brandes Small Cap Value Fund seeks long term capital appreciation.

**Price/Book:** price per share divided by book value per share. **Price/Earnings:** price per share divided by earnings per share. **Price/Cash Flow:** price per share divided by cash flow per share. **Active Share:** a measure of the percentage of stock holdings in a manager's portfolio that differ from the benchmark index. **Standard Deviation:** a measure of how much an investment's returns can vary from its average return. **Weighted Average Market Cap:** the weighted average capitalization of the companies based on total securities owned in the portfolio. **Dividend Yield:** calculated by annualizing the last quarterly dividend paid and dividing it by the current share price. The dividend yield is that of the securities held in the portfolio; it is not reflective of the yield distributed to shareholders.

**<sup>1</sup>SEC 30-Day Yield:** This calculation is based on a 30-day period ending on the last day of the month shown. It is computed by dividing the net investment income per share earned during the period by the maximum offering price per share on the last day of the period. The yield figure reflects the dividends and interest earned during the period, after the deduction of the fund expenses. A subsidized yield takes into consideration the expenses paid by the Advisor.

The Russell 2000 Index with gross dividends measures the performance of the small-cap segment of the U.S. equity universe.

The Russell 2000 Value Index with gross dividends measures performance of the small cap segment of the U.S. equity universe. Securities are categorized as growth or value based on their relative book-to-price ratios, historical sales growth, and expected earnings growth.

**Because the values of the Fund's investments will fluctuate with market conditions, so will the value of your investment in the Fund. You could lose money on your investment in the Fund, or the Fund could underperform other investments. The values of the Fund's investments fluctuate in response to the activities of individual companies and general stock market and economic conditions. Stocks of small-sized and mid-sized companies tend to have limited liquidity and usually experience greater price volatility than stocks of larger companies.**
