

# Unprecedented Opportunity in U.S. Small Cap Value Equities?

With U.S. small cap equities trading above many other asset classes<sup>1</sup>, we believe selectivity is now more important than ever in identifying opportunities. We have observed that U.S. small cap value stocks currently trade at attractive levels relative to both U.S. small and large cap growth stocks.

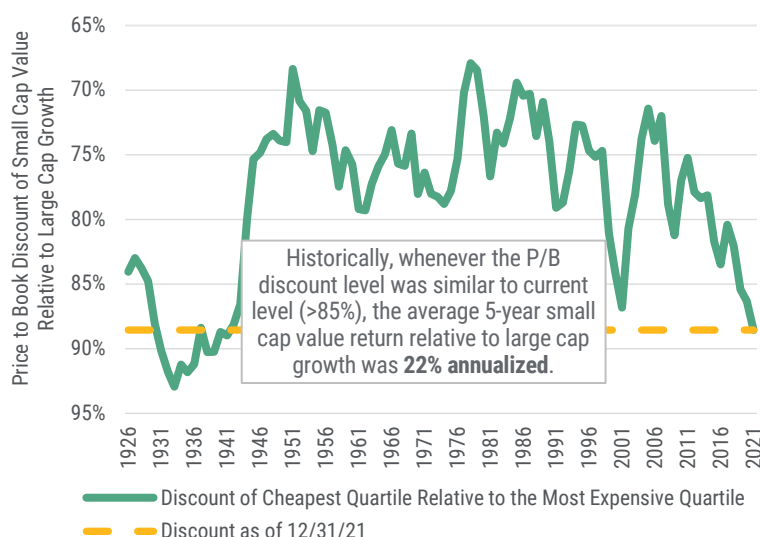

**U.S. small cap value stocks trade at what we consider appealing discount levels compared to U.S. small growth stocks.**

Discount Levels  
(U.S. Small Cap Value vs. U.S. Small Cap Growth)<sup>2</sup>

- Historical Average Discount (12/31/94 – 3/31/22)
- Current Discount and Its Percentile Rank vs. History (3/31/22)

**U.S. small cap value stocks also trade at a large price-to-book discount to U.S. large cap growth stocks, which has historically boded well for small cap value returns.<sup>3</sup>**

DECEMBER 31, 1926 TO DECEMBER 31, 2021. Current P/B discount as of 12/31/2021. A positive relative return does not guarantee a positive absolute return.

**U.S. small caps have historically performed better than their large-cap peers following bear markets.\* This tendency, combined with U.S. small-cap value stocks' relative valuations vs. large- and small-cap growth stocks, leads us to believe that now may be a compelling time to consider U.S. small-cap value equities.**

Returns During and Subsequent to Bear Markets

TECH BUBBLE BURST	3/24/00-10/9/02	Cumulative Returns(%)	
		Subsequent 1-Yr	Subsequent 3-Yr
S&P 500	-47.38	36.16	62.39
Russell 2000	-41.03	61.64	104.37
Russell 2000 Value	1.56	55.64	108.86

COVID DRAWDOWN	2/19/20-3/23/20	Cumulative Returns(%)	
		Subsequent 1-Yr	Subsequent 3-Yr
S&P 500	-33.79	77.80	
Russell 2000	-40.66	120.70	
Russell 2000 Value	-43.14	121.71	

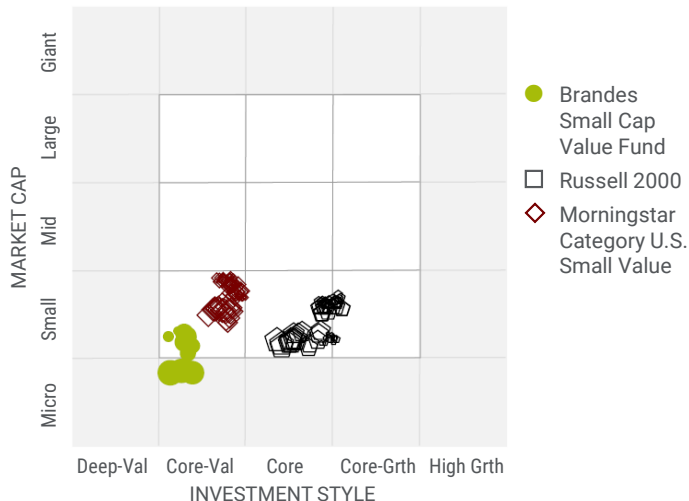

GLOBAL FINANCIAL CRISIS	10/9/07-3/9/09	Cumulative Returns(%)	
		Subsequent 1-Yr	Subsequent 3-Yr
S&P 500	-55.25	72.29	115.84
Russell 2000	-58.53	97.90	147.77
Russell 2000 Value	-59.56	103.66	141.35

\*Bear markets are periods during which the S&P 500 declined 20% or more.

Past performance is not a guarantee of future results. One cannot invest directly in an index. The portfolio characteristics shown relate to a single account as of date noted, deemed by Brandes to be generally representative of the strategy. Not every account will have these exact characteristics. The actual characteristics with respect to any particular account will vary based on a number of factors including but not limited to: (i) the size of the account; (ii) investment restrictions applicable to the account, if any; and (iii) market exigencies at the time of investment. Data is updated on a quarterly basis. The information provided in this material should not be considered a recommendation to purchase or sell any particular security. It should not be assumed that any security transactions, holdings or sectors discussed were or will be profitable, or that the investment recommendations or decisions we make in the future will be profitable or will equal the investment performance discussed herein. Strategies discussed are subject to change at any time by the investment manager in its discretion due to market conditions or opportunities. The Brandes investment approach tends to result in portfolios that are materially different than their benchmarks with regard to characteristics such as risk, volatility, diversification, and concentration. International and emerging markets investing is subject to certain risks such as currency fluctuation and social and political changes; such risks may result in greater share price volatility. Diversification does not assure a profit or protect against a loss in a declining market.

**Because the values of the Fund's investments will fluctuate with market conditions, so will the value of your investment in the Fund. You could lose money on your investment in the Fund, or the Fund could underperform other investments. The values of the Fund's investments fluctuate in response to the activities of individual companies and general stock market and economic conditions. In addition, the performance of foreign securities depends on the political and economic environments and other overall economic conditions in the countries where the Fund invests. Emerging country markets involve greater risk and volatility than more developed markets. Some emerging markets countries may have fixed or managed currencies that are not free-floating against the U.S. dollar. Certain of these currencies have experienced, and may experience in the future, substantial fluctuations or a steady devaluation relative to the U.S. dollar. Diversification does not assure a profit or protect against a loss in a declining market. It is not possible to invest directly in an index. Stocks of small-sized and mid-sized companies tend to have limited liquidity and usually experience greater price volatility than stocks of larger companies.**
