Brandes Separately Managed Account Reserve Trust

Dear Fellow Investor,

In the six months ended March 31, 2022, the Brandes Separately Managed Account Reserve Trust Fund declined 5.03%, while its benchmark, the Bloomberg Barclays U.S. Aggregate Bond Index, declined 5.92%.

Boxing great Mike Tyson once said: “Everyone has a plan until they get punched in the mouth.” The swift repricing of fixed income markets in the first quarter 2022, the likes which we have not seen since the 1970s, appeared to knock the Federal Reserve (Fed) and many investors on their heels.

During this time, the Fed was forced to quickly pivot from their plan of slowly and methodically winding down the most accommodative monetary policy in their history, to aggressively updating their forecasts for future rate hikes and balance sheet reductions.

In mid-December 2021 the Fed released its closely watched “dot plot”¹, which pegged the median forecast for the fed funds rate at 0.81% for year-end 2022 and 1.65% for year-end 2023. The updated March dot plot pegged the median fed funds rate at 2.05% for year-end 2022 and 2.81% for year-end 2023. This represents an abrupt upward shift in just three months and is particularly interesting in the context of the Fed’s view that the long-term normalized fed funds rate is 2.5%. The updated dot plot forecasts imply that the Fed believes that they will have to aggressively tighten above the projected long-term normalized rate to tame inflation. That is a considerable about-face from the transitory narrative that dominated their thinking for the better part of the past two years.

Market expectations have abruptly changed as well. During the fourth quarter 2021 we observed the disconnect between the Fed’s forward interest rate guidance and market expectations, noting that market expectations for the terminal fed funds rate were much lower than Fed guidance. As the market has reset future expectations guided by the newly hawkish Fed, rates have swiftly moved higher to levels not seen in several years.

After two years of a global health pandemic, during recent months the world has had to grapple with the worst outbreak of European military violence since World War II. Navigating monetary policy through this turbulent time has undoubtedly been a difficult task, but history will likely show that the Fed has simply waited too long to begin policy normalization and hence has run the risk of falling well behind the curve on inflation. Many commentators (including ourselves) have made this accusation, and we finally feel like we are no longer the old man yelling at the clouds when it comes to expressing concerns about inflation.

We have previously accused the Fed of being guilty of policy inertia and we have hoped that inertia would not lead to a policy error. It increasingly looks like the Fed has indeed made a policy error with its continuation of unprecedented stimulus well after the initial shock of the pandemic receded. As a result, taming inflation while achieving a

Brandes Separately Managed Account Reserve Trust

soft landing for the economy has become decidedly more difficult and could lead to additional market volatility.

During the trailing six-month period ending March 31, 2022, holdings in energy (**Range Resources & Occidental Petroleum**), services (**Prime Security Services**) and healthcare (**Tenet Healthcare**) aided returns.

Select holdings in banking (**U.S. Bank & Goldman Sachs**) and telecom (**Telecom Italia**) detracted from returns.

The fund's underweight to agency mortgage-backed securities (MBS) aided performance during the period.

Term-structure positioning was a positive factor in performance as interest rates rose sharply. The fund was positioned near the bottom of its duration-controlled band during the period, helping to mitigate the impact of rising rates on a relative basis.

Select Portfolio Activity

During the period, the Fund added new positions in **Mauser Packaging** (7.25% coupon, maturing 4/15/25, rated Caa3/CCC), **Charles Schwab Inc.** (5.375% coupon, perpetual, callable 6/1/25, rated Baa2/BBB), **Citigroup Inc.** (4.40% coupon, maturing 6/10/25, rated Baa2/BBB), **Methanex Corp** (5.125% coupon, maturing 10/15/27, rated Ba1/BB), **Coty Inc.** secured debt (5.00% coupon, maturing 4/15/26, rated B1/B+) and **American Transmission System** (2.65% coupon, maturing 1/15/32, rated A3/BBB).

We believe that the Charles Schwab bond that we purchased is a good example of a situation where the distinctive structure of the security presents an attractive value opportunity. This bond is a junior subordinated security – it ranks lower in the company's capital structure. It pays a fixed-rate coupon until June 2025. If the bond is not called in June 2025, it will become a perpetual security, and its coupon will revert to a floating rate based on the 5-year U.S. Treasury rate plus 4.97% - with a quarterly reset. The reset rate will be at a yield spread that is similar to where low-quality high yield bonds generally trade.

The distinctive feature of this bond is that if Charles Schwab chooses not to call the security in June 2025, the company does not have the option to call it again for an additional five years. At today's interest rates the coupon would reset to nearly 7%. Given the relatively high cost of a coupon reset and the limited flexibility offered to the company for future calls, we believe that this bond is best treated as a bullet security with a 3-year maturity.

Charles Schwab issued this bond in April 2020 during the early stages of the pandemic, which we believe is the likely explanation of why the bond's structure is not representative of the strong underlying credit quality of the company. As a result, this represents an attractive value opportunity to us.

Brandes Separately Managed Account Reserve Trust

Coty Inc. is a world leader in beauty with 75 brands and is home to well-known brands such as CoverGirl, Clairol and Max Factor. The company experienced turnover in the chief executive officer's (CEO's) chair with four different CEOs in 2020. Additionally, the pandemic affected revenues as beauty sales suffered in a world dominated by Zoom calls.

However, Coty is in the early stages of an operational turnaround centered on three key initiatives: 1) shifting the mix toward prestige brands with a focus on clean and green—i.e., CoverGirl Clean Fresh vegan makeup; 2) stabilizing its mass market beauty portfolio; and 3) reducing leverage through applying strong operational cash flows to paying down debt and divesting non-core brands.

As the pandemic recedes and more people can return to the office, travel, and engage in leisure activities, we believe Coty is well positioned to benefit from positive industry trends, as well as specific steps the company has taken to strengthen its balance sheet and product portfolio.

American Transmission System is a regulated operating company of First Energy. We believe the company's bonds offer an attractive higher-quality position within the First Energy capital structure.

The Fund also added to existing positions in **MicroStrategy**, **Netflix**, **Allison Transmission** and **Telecom Italia**.

The Fund exited our full position in **Occidental Petroleum** (3.50% coupon, maturing 6/15/25, rated Ba1/BB+), experienced a full call in **Range Resources** (9.25% coupon, maturing 2/1/26, rated B1/BB-), and saw maturities in **Microsoft Corp.** and **ExxonMobil**.

Outlook

From a total return perspective, the performance of virtually the entire fixed income universe was quite painful during the first quarter of 2022. Interest rates moved up swiftly from a very low base, leading to negative returns across the fixed income spectrum.

As the second quarter of 2022 begins, higher yields in the market and in the Fund can help cushion some of the impact if we are in the midst of secular change to a higher rate environment. With any investment, and in particular fixed income, time horizon is important. In the short-term, interest rate increases can cause negative total returns. However, over a longer time horizon, higher rates should allow a diversified portfolio to generate a higher level of income.

For a considerable period now, we have attempted to tilt Brandes Separately Managed Account Reserve Trust into what we believe is a defensive posture in order to mitigate some of the detrimental impact of higher interest rates and wider yield spreads. The Fund continues to favor shorter-maturity corporate bonds and those that we

Brandes Separately Managed Account Reserve Trust

believe exhibit strong, tangible asset coverage. We are managing duration toward the shorter end of our duration-controlled range.

We remain underweight Agency mortgage-backed securities. In March, the Fed finally wrapped up their temporary support for a market where they have been making outright purchases since 2008. We are cautious on this market, given that the Fed owns 37% of the universe and has been absorbing nearly 50% of supply since March 2020.²

While the amount of Agency mortgage-backed securities supply could slow if interest rates continue to move higher, it remains to be seen how the market will respond to the withdrawal of explicit central bank support.

As we move forward, we believe prudence dictates that we continue our search for value at the margins while continuing to tilt the Fund to what we believe is a relatively defensive posture.

As always, thank you for your business and continued trust.

Sincerely yours,

The Brandes Fixed Income Investment Committee

Brandes Investment Trust

¹Bloomberg, Federal Reserve, 12/15/21, and 3/17/22

²Mortgage QE 2020-22: A Look Back and Ahead, Bloomberg Intelligence, 3/14/22

Agency mortgage-backed securities (MBS): An MBS issued by one of three quasi-governmental agencies: The Government National Mortgage Association (GNMA or Ginnie Mae), the Federal National Mortgage Association (FNMA or Fannie Mae), and the Federal Home Loan Mortgage Corporation (Freddie Mac). A MBS is an investment similar to a bond that is made up of a bundle of home loans bought from the banks that issued them.

Asset Coverage: Measures how well a company can repay its debts by selling or liquidating its assets.

Bullet security: a debt investment whose entire principal value is paid in one lump sum on its maturity date, rather than amortized over its lifetime.

Cash Flow: The amount of cash generated minus the amount of cash used by a company in a given period.

Coupon: The annual interest rate paid on a bond, expressed as a percentage of the face value and paid from issue date until maturity.

Dot Plot: Data points that are plotted on a graph and is used by the Federal Reserve to show its projected interest-rate outlook. Source: Investopedia

Duration: The weighted maturity of a fixed-income investment's cash flows, used in the estimation of the price sensitivity of fixed-income securities for a given change in interest rates.

Brandes Separately Managed Account Reserve Trust

Mortgage-Backed Security: A type of asset-backed security which is secured by a mortgage or collection of mortgages.

Secured Debt: Debt that is backed by collateral to reduce the risk associated with lending. Source: Investopedia

Total Return: Income plus capital appreciation.

Yield: Annual income from the investment (dividend, interest, etc.) divided by the current market price of the investment.

Yield Spread: The net difference between two interest-bearing instruments of varying maturities, credit ratings, issuer or risk level.

Short-term debt refers to fixed income securities set to mature in 1 to 5 years from the issue or purchase date. Long-term debt refers to fixed income securities set to mature more than 10 years from the issue or purchase date.

Diversification does not assure a profit or protect against a loss in a declining market.

Because the values of the fund's investments will fluctuate with market conditions, so will the value of your investment in the fund. You could lose money on your investment in the fund, or the fund could underperform other investments. The values of the fund's investments fluctuate in response to the activities of individual companies and general bond market and economic conditions. Investments in small and medium capitalization companies tend to have limited liquidity and greater price volatility than large capitalization companies.

As with most fixed income funds, the income on and value of your shares in the fund will fluctuate along with interest rates. When interest rates rise, the market prices of the debt securities the fund owns usually decline. When interest rates fall, the prices of these securities usually increase. Generally, the longer the fund's average portfolio maturity and the lower the average quality of its portfolio, the greater the price fluctuation. The price of any security owned by the fund may also fall in response to events affecting the issuer of the security, such as its ability to continue to make principal and interest payments or its credit rating. Below investment grade debt securities are speculative and involve a greater risk of default and price change due to changes in the issuer's creditworthiness than higher grade debt. The market prices of these debt securities may fluctuate more than the market prices of investment grade debt securities and may decline significantly in periods of general economic difficulty. Credit ratings are measured on a scale that generally ranges from AAA (highest) to D (lowest). All Fund securities except for those labeled "Not Rated" and "Other" have been rated by Moody's, S&P or Fitch, which are each a Nationally Recognized Statistical Rating Organization. All Index securities except for those labeled "Not Rated" have been rated by Moody's or S&P. Credit ratings are subject to change.

Index Guide

The Bloomberg U.S. Aggregate Bond Index is a broad-based benchmark that measures the investment grade, U.S. dollar-denominated, fixed-rate taxable bond market. This index is a total return index which reflects the price changes and interest of each bond in the index.

One cannot invest directly in an index.

The Brandes Separately Managed Account Reserve Trust is distributed by ALPS Distributors, Inc.

Brandes Separately Managed Account Reserve Trust

The following chart compares the value of a hypothetical \$100,000 investment in the Separately Managed Account Reserve Trust from September 30, 2011 to March 31, 2022 with the value of such an investment in the Bloomberg U.S. Aggregate Bond Index and Bloomberg U.S. Intermediate Credit Bond Index for the same period.

Value of \$100,000 Investment vs Bloomberg U.S. Aggregate Bond Index & Bloomberg U.S. Intermediate Credit Bond Index (Unaudited)

Average Annual Total Return Periods Ended March 31, 2022

	<u>One Year</u>	<u>Five Years</u>	<u>Ten Years</u>	<u>Since Inception</u>
Brandes Separately Managed Account Reserve Trust	(2.01)%	2.46%	4.03%	4.73%
Bloomberg Barclays U.S. Aggregate Bond Index	(4.15)%	2.14%	2.24%	3.64%
Bloomberg Barclays U.S. Intermediate Credit Bond Index	(4.05)%	2.47%	2.74%	4.00%

Performance data quoted represents past performance; past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance of the Fund may be lower or higher than the performance quoted. Performance data current to the most recent month end may be obtained by calling 800-331-2979.

Brandes Separately Managed Account Reserve Trust

The returns shown do not reflect the deduction of taxes that a shareholder would pay on fund distributions or the redemption of fund shares.

Asset Allocation as a Percentage of Total Investments as of March 31, 2022 (Unaudited)

Brandes Separately Managed Account Reserve Trust

Expense Example (Unaudited)

As a shareholder of the Fund, you incur ongoing costs, including investment advisory and administrative fees and other Fund expenses. The example below is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds. Note that for this Fund, which is used in wrap-fee programs, fees and expenses are paid at the wrap account level rather than the Fund level.

The example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period from October 1, 2021 to March 31, 2022 (the “Period”).

Actual Expenses

This section provides information about actual account values and actual expenses. The “Ending Account Value” shown is derived from the Fund’s actual returns. You may use the information in this section, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number given for the Fund under the heading “Expenses Paid During Period” to estimate the expenses you paid on your account during this period.

Fund	<u>Beginning Account Value</u>	<u>Ending Account Value</u>	<u>Annualized Expense Ratio</u>	<u>Expenses Paid During the Period*</u>
Separately Managed Account Reserve Trust**	\$1,000.00	\$949.70	0.00%	\$0.00

* The Fund’s expenses are equal to the Fund’s expense ratio for the period, multiplied by the average account value over the period, multiplied by 182/365 (to reflect the one half-year period).

** No expenses have been charged to the Brandes Separately Managed Account Reserve Trust (“SMART Fund”) over the period, as the SMART Fund participates in a wrap-fee program sponsored by investment advisors unaffiliated with the SMART Fund. See Note 3 to the Financial Statements. Fees and expenses are charged at the wrap account level.

Hypothetical Example for Comparison Purposes

This section provides information about hypothetical account values and hypothetical expenses based on the Fund’s actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund’s actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other mutual funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other mutual funds.

Brandes Separately Managed Account Reserve Trust

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transaction costs, such as brokerage commissions on purchase and sales of Fund shares. Therefore, the last column of the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

Fund	Beginning Account Value	Ending Account Value	Annualized Expense Ratio	Expenses Paid During the Period*
Separately Managed Account Reserve Trust**	\$1,000.00	\$1,024.93	0.00%	\$0.00

* The Fund's expenses are equal to the Fund's expense ratio for the period, multiplied by the average account value over the period, multiplied by 182/365 (to reflect the one half-year period).

** No expenses have been charged to the Brandes Separately Managed Account Reserve Trust ("SMART Fund") over the period, as the SMART Fund participates in a wrap-fee program sponsored by investment advisors unaffiliated with the SMART Fund. See Note 3 to the Financial Statements. Fees and expenses are charged at the wrap account level.

SCHEDULE OF INVESTMENTS — March 31, 2022 (Unaudited) (continued)

LIBOR London Interbank Offered Rate

- (a) Non-income producing security.
- (b) Variable rate security. The coupon is based on an underlying pool of loans.
- (c) Variable rate security. The coupon is based on a reference index and spread index.
- (d) Acquired in a transaction exempt from registration under Rule 144A or Section 4(a)(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities was \$35,445,340 which represented 20.95% of the net assets of the Fund.
- (e) The rate shown is the annualized seven day yield as of March 31, 2022.

(1) Net investment income per share has been calculated based on average shares outstanding during the period.

(2) Not annualized.

(3) Reflects the fact that no fees or expenses are incurred by the Fund. The Fund is an integral part of “wrap-fee” programs sponsored by investment advisors and/or broker-dealers unaffiliated with the Fund or the Advisor. Participants in these programs pay a “wrap” fee to the sponsor of the program.

(4) Annualized.

The accompanying notes to financial statements are an integral part of this statement.

Brandes Separately Managed Account Reserve Trust

NOTES TO FINANCIAL STATEMENTS

NOTE 1 – ORGANIZATION

The Separately Managed Account Reserve Trust (the “Fund”) is a series of Brandes Investment Trust (the “Trust”). The Trust is registered under the Investment Company Act of 1940, as amended (the “1940 Act”), as a diversified, open-end management investment company. The Fund began operations on October 3, 2005. The Fund invests its assets primarily in debt securities and seeks to maximize total return.

NOTE 2 – SIGNIFICANT ACCOUNTING POLICIES

The Fund is an investment company that applies the accounting and reporting guidance issued in Topic 946, “Financial Services-Investment Companies”, by the Financial Accounting Standards Board (“FASB”). The following is a summary of significant accounting policies consistently followed by the Fund. These policies are in conformity with generally accepted accounting principles (“GAAP”) in the United States of America.

- A. *Repurchase Agreements.* The Fund may enter into repurchase agreements with government securities dealers recognized by the Federal Reserve Board, with member banks of the Federal Reserve System or with other brokers or dealers that meet the credit guidelines established by the Board of Trustees. Each Fund will always receive and maintain, as collateral, U.S. Government securities whose market value, including accrued interest (which is recorded in the Schedules of Investments), will be at least equal to 100% of the dollar amount invested by the Fund in each agreement, and the Fund will make payment for such securities only upon physical delivery or upon evidence of book entry transfer to the account of the Fund’s custodian. If the term of any repurchase transaction exceeds one business day, the value of the collateral is marked-to-market on a daily basis to ensure the adequacy of the collateral. Before causing the Fund to enter into a repurchase agreement with any other party, the investment advisor will determine that such party does not have any apparent risk of becoming involved in bankruptcy proceedings within the time frame contemplated by the repurchase agreement. If the seller defaults and the value of the collateral declines, or if bankruptcy proceedings are commenced with respect to the seller of the security, realization of the collateral by the Fund may be delayed or limited. At March 31, 2022, the Fund did not invest in repurchase agreements.
- B. *Foreign Currency Translation and Transactions.* Values of investments denominated in foreign currencies are converted into U.S. dollars using the spot market rates of exchange at the time of valuation. Purchases and sales of investments and dividend and interest income are translated into U.S. dollars using the spot market rates of exchange prevailing on the respective dates of such translations. The gain or loss resulting from changes in foreign exchange

Brandes Separately Managed Account Reserve Trust

NOTES TO FINANCIAL STATEMENTS — (continued)

rates is included with net realized and unrealized gain or loss from investments, as appropriate. Foreign securities and currency transactions may involve certain considerations and risks not typically associated with those of domestic origin.

Foreign securities are recorded in the financial statements after translation to U.S. dollars based on the applicable exchange rate at the end of the period. The Fund reports certain foreign currency-related transactions as components of realized gains or losses for financial reporting purposes, whereas such components are treated as ordinary income for federal income tax purposes.

- C. *Delayed Delivery Securities.* The Fund may purchase securities on a when issued or delayed delivery basis. “When-issued” or delayed delivery refers to securities whose terms are available and for which a market exists, but that have not been issued. For a when-issued or delayed delivery transaction, no payment is made until delivery date, which is typically longer than the normal course of settlement. When the Fund enters into an agreement to purchase securities on a when-issued or delayed delivery basis, the Fund segregates cash or liquid securities, of any type or maturity, equal in value to the Fund’s commitment. Losses may arise if the market value of the underlying securities change, if the counterparty does not perform under the contract, or if the issuer does not issue the securities due to political, economic, or other factors. The Fund did not have any open commitments on delayed delivery securities as of March 31, 2022.
- D. *Security Transactions, Dividends and Distributions.* Security transactions are accounted for on the trade dates. Realized gains and losses are evaluated on the basis of identified costs. Distributions from net investment income are declared daily and paid monthly. Distributions of net realized gains, if any, are declared at least annually. Dividend income and distributions to shareholders are recorded on the ex-dividend dates. Interest is recorded on an accrual basis. The Fund amortizes premiums and accretes discounts using the constant yield method.
- E. *Use of Estimates.* The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and reported amounts of income and expenses during the reporting period. Actual results could differ from those estimates and assumptions.
- F. *Indemnification Obligations.* Under the Trust’s organizational documents, its current and former officers and trustees are indemnified against certain liabilities arising out of the performance of their duties to the Trust. The Trust

Brandes Separately Managed Account Reserve Trust

NOTES TO FINANCIAL STATEMENTS — (continued)

has indemnified its trustees against any expenses actually and reasonably incurred by the trustees in any proceeding arising out of or in connection with the trustees' service to the Trust. In addition, in the normal course of business, the Trust enters into contracts that contain a variety of representations and warranties and provide general indemnifications. The Fund's maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Fund that have not yet occurred or that would be covered by other parties.

- G. *Accounting for Uncertainty in Income Taxes.* The Fund has elected to be taxed as a "regulated investment company" and intends to distribute substantially all its taxable income to its shareholders and otherwise comply with the provisions of the Internal Revenue Code applicable to regulated investment companies. The Fund may be subject to a nondeductible excise tax calculated as a percentage of certain undistributed amounts of net investment income and net capital gains. The Fund intends to distribute its net investment income and capital gains as necessary to avoid this excise tax. Therefore, no provision for federal income taxes or excise taxes has been made.

The Trust analyzes all open tax years, as defined by the applicable statute of limitations, for all major jurisdictions. Open tax years for the Fund are those that are open for exam by taxing authorities (2018 through 2021). As of March 31, 2022 the Trust has no examinations in progress.

Management has analyzed the Trust's tax positions, and has concluded that no liability should be recorded related to uncertain tax positions expected to be taken on the tax return for the fiscal year-ended September 30, 2021.

The Trust identifies its major tax jurisdictions as the U.S. Government and the State of California. The Fund is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will significantly change in the next twelve months.

- H. *Fair Value Measurements.* The Trust has adopted GAAP accounting principles related to fair value accounting standards which establish a definition of fair value and set out a hierarchy for measuring fair value. These standards require additional disclosures about the various inputs and valuation techniques used to develop the measurements of fair value and a discussion of changes in valuation techniques and related inputs during the period. These inputs are summarized in the three broad levels listed below:

Level 1—Fair value measurement within Level 1 should be based on an unadjusted quoted price in an active market that the Fund has the ability to access for the asset or liability at the measurement date. Because a quoted price alone forms the basis for the measurement, the access requirement

Brandes Separately Managed Account Reserve Trust

NOTES TO FINANCIAL STATEMENTS — (continued)

within Level 1 limits discretion in pricing the asset or liability, including in situations in which there are multiple markets for the asset or liability with different prices and no single market represents a principal market for the asset or liability. Importantly, the FASB has indicated that when a quoted price in an active market for a security is available, that price should be used to measure fair value without regard to an entity's intent to transact at that price.

Level 2—Fair value measurement within Level 2 should be based on all inputs other than unadjusted quoted prices included within Level 1 that are observable for the asset or liability. Other significant observable market inputs include quoted prices for similar instruments in active markets, quoted adjusted prices in active markets, quoted prices for identical or similar instruments in markets that are not active, and model derived valuations in which the majority of significant inputs and significant value drivers are observable in active markets.

Level 3—Fair value measurement within Level 3 should be based on unobservable inputs in such cases where markets do not exist or are illiquid. Significant unobservable inputs include model derived valuations in which the majority of significant inputs or significant value drivers are unobservable. Unobservable inputs are those inputs that reflect the Fund's own assumptions that market participants would use to price the asset or liability based on the best available information.

- I. *Security Valuation.* Fixed income securities including corporate, convertible and municipal bonds and notes, U.S. government agencies, U.S. Treasury obligations, sovereign issues, bank loans, convertible preferred securities and non-U.S. bonds are normally valued on the basis of quotes obtained from brokers and dealers or independent pricing services or sources. Independent pricing services typically use information provided by market makers or estimates of market values obtained from yield data relating to investments or securities with similar characteristics. The service providers' internal models use inputs that are observable such as, among other things, issuer details, interest rates, yield curves, prepayment speeds, credit risks/ spreads, default rates and quoted prices for similar assets. Securities that use similar valuation techniques and inputs as described above are categorized as Level 2 of the fair value hierarchy.

Fixed income securities purchased on a delayed-delivery basis are typically marked to market daily until settlement at the forward settlement date.

Repurchase agreements and demand notes, for which neither vendor pricing nor market maker prices are available, are valued at amortized cost on the day of valuation, unless Brandes Investment Partners, L.P. (the "Advisor")

Brandes Separately Managed Account Reserve Trust

NOTES TO FINANCIAL STATEMENTS — (continued)

determines that the use of amortized cost valuation on such day is not appropriate (in which case such instrument is fair valued in accordance with the fair value procedures of the Trust).

Mortgage and asset-backed securities are usually issued as separate tranches, or classes, of securities within each package of underlying securities. These securities are also normally valued by pricing service providers that use broker-dealer quotations or valuation estimates from their internal pricing models. The pricing models for these securities usually consider tranche level attributes, estimated cash flows and market based yield spreads for each tranche, current market data and packaged collateral performance, as available. Mortgage and asset-backed securities that use such valuation techniques and inputs are categorized as Level 2 of the fair value hierarchy only if there are significant observable inputs used.

Common stocks, exchange-traded fund shares and financial derivative instruments, such as futures contracts or options contracts that are traded on a national securities or commodities exchange, are valued at the last reported sales price, in the case of common stocks and exchange-traded fund shares, or, in the case of futures contracts or options contracts, the settlement price determined by the relevant exchange. Securities listed on the NASDAQ National Market System for which market quotations are readily available are valued using the NASDAQ Official Closing Price. To the extent these securities are actively traded and valuation adjustments are not applied, they are categorized as Level 1 of the fair value hierarchy.

Valuation adjustments may be applied to certain securities that are solely traded on a foreign exchange to account for the market movement between the close of the foreign market and the close of the New York Stock Exchange (“NYSE”). These securities are generally valued using pricing service providers that consider the correlation of the trading patterns of the foreign security to the intraday trading in the U.S. markets for investments. Securities using these valuation adjustments are categorized as Level 2 of the fair value hierarchy. None of the Fund’s securities were fair valued utilizing this method as of March 31, 2022.

Investments in registered open-end management investment companies are valued based upon the Net Asset Values (“NAVs”) of such investments and are categorized as Level 1 of the fair value hierarchy. If, on a particular day, a share price of an investment company is not readily available, such securities are fair valued in accordance with the fair value procedures of the Trust.

Certain securities may be fair valued in accordance with the fair valuation procedures approved by the Board of Trustees. The Fair Valuation Committee is generally responsible for overseeing the day to day valuation

Brandes Separately Managed Account Reserve Trust

NOTES TO FINANCIAL STATEMENTS — (continued)

processes and reports periodically to the Board. The Fair Valuation Committee is authorized to make all necessary determinations of the fair value of portfolio securities and other assets for which market quotations are not readily available or if it is deemed that the prices obtained from brokers and dealers or independent pricing services are unreliable.

In using fair value pricing, the Fund attempts to establish the price that it might reasonably have expected to receive upon a sale of the security at 4:00 p.m. Eastern time. Valuing securities at fair value involves greater reliance on judgment than valuation of securities based on readily available market quotations. When using fair value to price securities, the Fund may value those securities higher or lower than another fund using market quotations or fair value to price the same securities. Further, there can be no assurance that the Fund could obtain the fair value assigned to a security if it were to sell the security at approximately the time at which the Fund determines its net asset value.

The following is a summary of the level inputs used, as of March 31, 2022, involving the Fund's assets carried at fair value. The inputs used for valuing securities may not be an indication of the risk associated with investing in those securities.

Description	Level 1	Level 2	Level 3	Total
Separately Managed Account Reserve Trust				
Common Stocks	\$ 2,982	\$ —	\$—	\$ 2,982
Asset Backed Securities	—	4,763,440	—	4,763,440
Corporate Bonds	—	101,272,620	—	101,272,620
Government Securities	—	48,175,020	—	48,175,020
Convertible Bonds	—	4,318,414	—	4,318,414
Foreign Issuer Bonds	—	2,210,745	—	2,210,745
Mortgage Backed Securities	—	5,988,118	—	5,988,118
Short-Term Investments	<u>1,518,753</u>	<u>—</u>	<u>—</u>	<u>1,518,753</u>
Total Investments in Securities	<u>\$1,521,735</u>	<u>\$166,728,357</u>	<u>\$—</u>	<u>\$168,250,092</u>

There were no Level 3 securities in the Fund at the beginning or the end of the period ended March 31, 2022.

NOTE 3 – INVESTMENT ADVISORY FEE AND OTHER TRANSACTIONS WITH AFFILIATES

- A. *Advisor Fee.* The Advisor provides the Fund with investment management services under an Investment Advisory Agreement. The Advisor receives no advisory fee or other fee from the Fund. The financial statements of the Fund reflect the fact that no fees or expenses are incurred by the Fund. It should be understood, however, that the Fund is an integral part of “wrap-fee” programs sponsored by investment advisors unaffiliated with the Fund and the Advisor.

Brandes Separately Managed Account Reserve Trust

NOTES TO FINANCIAL STATEMENTS — (continued)

Typically, participants in these programs pay a “wrap-fee” to their investment advisors. Although the Fund does not compensate the Advisor directly for its service under the Investment Advisory Agreement, the Advisor benefits from its relationships with the sponsors of wrap-fee programs for which the Fund is an investment option. Certain officers and Trustees of the Trust are also officers of the Advisor.

- B. *Administration Fee.* The Northern Trust Company (the “Administrator”) acts as the administrator for the Fund. The Administrator prepares various federal and state regulatory filings; prepares reports and materials to be supplied to the Trustees; monitors the activities of the Fund’s custodian, transfer agent and accountant; coordinates the preparation and payment of Fund expenses; and prepares several Fund reports. The Advisor compensates the Administrator on behalf of the Fund for the services the Administrator performs for the Fund.
- C. *Distribution Fees.* ALPS Distributors, Inc. (the “Distributor”), a registered broker-dealer, acts as the Fund’s principal underwriter in a continuous public offering of the Fund’s shares. All of the Fund’s distribution fees are paid by the Advisor.

NOTE 4 – PURCHASES AND SALES OF SECURITIES

The cost of purchases and the proceeds from sales of securities of the Fund, excluding short-term investments, were as follows for the period ended March 31, 2022:

U.S. Government		Other	
Purchases	Sales	Purchases	Sales
\$—	\$13,217,617	\$23,168,203	\$11,938,630

NOTE 5 – CAPITAL STOCK TRANSACTIONS

The Fund’s capital stock activity in shares and dollars during the six month period ended March 31, 2022 and the year ended September 30, 2021, was as follows (shares and dollar amounts in thousands):

	Six Months Ended 3/31/2022		Year Ended 9/30/2021	
	Shares	Amount	Shares	Amount
Shares Sold	1,478	\$ 12,704	3,846	\$ 34,103
Issued on Reinvestment of Distributions.....	313	2,684	679	6,014
Shares Redeemed	(2,387)	(20,565)	(3,689)	(32,674)
Net Increase/(Decrease) Resulting from Fund Share Transactions	(596)	\$ (5,177)	836	\$ 7,443

Brandes Separately Managed Account Reserve Trust

NOTES TO FINANCIAL STATEMENTS — (continued)

NOTE 6 – FEDERAL INCOME TAX MATTERS

GAAP requires that certain components of net assets be reclassified between financial and tax reporting. Temporary differences do not require reclassification. Temporary and permanent differences have no effect on net assets or net asset value per share. For the year ended September 30, 2021, the Fund made the following permanent book-to-tax reclassifications primarily related to the treatment of paydowns, the difference between book and tax accretion methods for market premium and the expiration of capital loss carryforwards:

<u>Undistributed Net Investment Income</u>	<u>Accumulated Net Realized Loss</u>	<u>Paid-In Capital</u>
\$186,822	\$(158,761)	\$(28,061)

As of September 30, 2021, the Fund's components of distributable earnings on a tax basis were as follows:

Cost of investments for tax purposes	\$180,158,933
Gross tax unrealized appreciation	10,614,300
Gross tax unrealized depreciation	(1,983,675)
Net unrealized appreciation (depreciation)	8,630,625
Distributable ordinary income	—
Distributable long-term capital gains	—
Total distributable earnings	—
Other accumulated losses	(8,975,577)
Total accumulated losses	\$ (344,952)

The differences between book and tax basis distributable earnings are primarily related to the differences in classification of paydown gains and losses for tax purposes compared to book purposes. These differences are temporary.

As of September 30, 2021, the Fund had a capital loss carryforward with an indefinite expiration in the amount of \$8,975,577. During the tax year ended September 30, 2021, the Fund utilized \$2,871,334 in capital loss carryforwards. At September 30, 2021, the Fund did not have capital loss carryforwards expire.

The tax compositions of dividends for the years ended September 30, 2021 and September 30, 2020 for the Fund were as follows:

<u>Ordinary Income</u>		<u>Long Term Capital Gains</u>	
<u>2021</u>	<u>2020</u>	<u>2021</u>	<u>2020</u>
\$6,546,146	\$6,313,021	\$—	\$—

Brandes Separately Managed Account Reserve Trust

NOTES TO FINANCIAL STATEMENTS — (continued)

NOTE 7 – RISK FACTORS

The respiratory illness COVID-19 caused by a novel coronavirus has resulted in a global pandemic and caused major disruptions to economies and markets around the world, including the United States. Financial markets have experienced and may continue to experience extreme volatility and severe losses, and trading in many instruments was and may continue to be disrupted as a result. Liquidity for many instruments was and may continue to be greatly reduced for extended periods of time. Some interest rates are very low and in some cases yields are negative. Some sectors of the economy and individual issuers have experienced and may continue to experience particularly large losses. These circumstances may continue for an extended period of time, and may continue to affect adversely the value and liquidity of the fund's investments. The ultimate economic fallout from the pandemic, and the long-term impact on economies, markets, industries and individual issuers, are not known. Governments and central banks, including the Federal Reserve in the U.S., have taken extraordinary and unprecedented actions to support local and global economies and the financial markets. These actions have resulted in significant expansion of public debt, including in the United States. The long-term consequences of this level of public debt are not known. In addition, certain interest rates have been reduced to very low levels. The impact of these measures, and whether they will be effective to mitigate the economic and market disruption, will not be known for some time.

Recent events relating to the armed conflict in Ukraine and the global economic sanctions that have resulted may adversely impact global economic and market activity, and contribute to significant volatility in financial markets. The impact of the conflict has been rapidly evolving, and the ultimate economic fallout and long-term impact on economies, markets, industries and individual companies, are not known.

NOTE 8 – SUBSEQUENT EVENTS

In preparing these financial statements, the Trust has evaluated events and transactions for potential recognition or disclosure through the date the financial statements were available to be issued. The Trust has concluded that there are no subsequent events to note.

BOARD CONSIDERATIONS AND CONTINUATION OF INVESTMENT ADVISORY AGREEMENT - SMART

In November, 2021, the Board of Trustees of Brandes Investment Trust (“Trust”), including the independent Trustees, unanimously approved renewal of the Investment Advisory Agreement (“Agreement”) between the Trust and Brandes Investment Partners, L.P. (“Adviser”) for an additional one-year term with respect to the Separately Managed Account Reserve Trust, a series of the Trust (the “Fund”).

Information Reviewed

During the course of each year, the Board receives and reviews a wide variety of materials relating to the nature, quality and extent of the services provided by the Adviser to the Fund, including reports on investment results, portfolio composition, portfolio trading practices, and other matters. In addition, in connection with the Board’s annual review of the Agreement, the Trustees requested and reviewed supplementary information from the Adviser that included materials and analysis about the Fund’s investment results and advisory fees; information about the services provided by the Adviser to the Fund, such as compliance monitoring and portfolio trading practices, and the risks assumed by the Adviser in connection with those services; information about the services provided and the fees charged by the Adviser to its institutional and other clients employing similar strategies, including comparisons of those services and fees to the services and fees for the Fund; financial and profitability information regarding the Adviser and its relationship with the Fund; and information about the Adviser’s investment and other personnel providing services to the Fund, as well as the Adviser’s practices to evaluate and compensate its investment personnel. The Trustees also obtained and reviewed information from FUSE Research Network LLC, an independent third party data provider, comparing the Fund’s investment results and fees and expenses to those of peer groups and categories of funds identified by FUSE as similar to the Fund.

In connection with the Board’s reviews, the Trustees received assistance and advice regarding legal and industry standards from counsel to the Trust and the independent Trustees. The Board discussed the approval of the Agreement with respect to the Fund with representatives of the Adviser at two Board meetings, and the independent Trustees discussed the Agreement in multiple private sessions with counsel at which no representatives of the Adviser were present. In deciding to approve the Agreement with respect to the Fund, the Board and the independent Trustees did not identify any single or particular piece of information that, in isolation, was the controlling factor, and each Trustee may have attributed different weight to each factor considered. This summary describes the most important, but not all, of the factors considered by the Board and the independent Trustees.

ADDITIONAL INFORMATION — (Unaudited) (continued)

Nature, Quality and Extent of Services

The Trustees considered the overall nature, quality and extent of services provided by the Adviser to the Fund. They considered, among other things, the quality and depth of the Adviser's investment, compliance and other personnel, the Adviser's regulatory compliance resources and program, the Adviser's business continuity and cyber-security programs, and the day-to-day administrative services provided to the Fund.

With respect to the Fund's investment results, the Trustees reviewed and considered detailed information provided by FUSE, which utilized Morningstar data, comparing the Fund's investment results to those of a peer group of similarly managed funds selected by FUSE, a larger group of funds selected by FUSE in the same investment classification as the Fund, and the Fund's benchmark index. The Trustees also met with representatives of FUSE, and discussed with them the methodology used by FUSE in determining the Fund's peer group and category. The FUSE report included confirmation that FUSE had selected peer group and category funds for comparison to the Fund independently of the Adviser. The Trustees noted that while the FUSE information covered both peer group and universe funds, the Trustees focused more on the peer group information because the peer group funds were more directly comparable to the Fund.

The Trustees considered that for the one-, five- and ten-year periods ended September 30, 2021, and since inception, the investment results of the Fund's single class of shares were above the median of the funds in its peer group and also ahead of benchmark.

In evaluating the Fund's performance, the Trustees generally considered long-term performance to be more important than short-term performance, but noted that short-term performance may be helpful in showing an improving trend. The Trustees noted the Adviser's continued commitment to the Graham and Dodd value strategy of investment management and its lack of style drift compared to other value managers; considered that it is not unusual for the performance of funds managed with such a long-term strategy to fall below performance measurement indices for some periods; and noted the Adviser's observations regarding the market environment in recent years, including the extended period that the value strategy has been out of favor in the market. They also noted that the Fund's investment approach is fully described in the prospectus, enabling Fund shareholders to decide if they are willing to accept the long-term outlook associated with the Adviser's investment approach.

Based on these reviews, the Trustees determined that under all of the circumstances the nature and quality of the services provided by the Adviser were sufficient for renewal of the Fund's investment advisory agreement.

Advisory Fees, Total Expenses, Profitability and Ancillary Benefits

With respect to advisory fees, the Trustees considered that investors in the Fund must be clients of wrap account programs sponsored by broker-dealers which have agreements with the Adviser or certain other persons or entities. They considered that the Fund does not pay advisory fees or other expenses, all of which are borne by the Adviser, but that investors pay management fees and other expenses at the wrap account level, and that the Adviser receives compensation from the wrap program sponsors and others. The Trustees determined that the Fund's advisory fees and total expense levels were fair and reasonable in light of the structure of the product. The Trustees also concluded that there was a reasonable sharing of any efficiencies or economies of scale at this time in light of the structure of the product.

The Trustees reviewed and considered information about the Adviser's financial capability to continue to provide services to the Fund, as well as an analysis of the profitability to the Adviser of its relationship with the Fund. The Trustees considered information regarding the ancillary benefits to the Adviser from its relationship with the Fund, which primarily related to compensation from wrap program sponsors that offer the Fund. The Trustees concluded that the Adviser's profitability from its relationship with the Fund is not excessive and that any ancillary benefits received are reasonable under the circumstances.

Conclusions

Based on their review, including consideration of the factors identified above, the Board and the independent Trustees concluded in the exercise of their reasonable business judgment that the Agreement is fair and reasonable to the Fund and its shareholders, and that renewal of the Agreement is in the best interests of the Fund and its shareholders.

PROXY VOTING PROCEDURES

The Advisor votes proxies relating to the Fund's portfolio securities in accordance with procedures adopted by the Advisor. You may obtain a description of these procedures, free of charge, by calling toll-free 1-800-331-2979. This information is also available through the Commission's website at <http://www.sec.gov>.

Information regarding how the Trust voted proxies relating to portfolio securities during the most recent 12-month period ended June 30 is available without charge, upon request, by calling 1-800-331-2979. This information is also available through the Commission's website at <http://www.sec.gov>.

PORTFOLIO HOLDINGS DISCLOSURE

The Trust files the Fund's complete schedule of portfolio holdings with the Commission for the first and third quarters of each fiscal year on Form N-PORT. The Trust's Form N-PORT filings are available on the Commission's website at

PRIVACY NOTICE

Brandes Investment Trust and Brandes Investment Partners, L.P. may collect non-public information about you from the following sources:

- Information we receive about you on applications or other forms;
- Information you give us orally; and
- Information about your transactions with us.

We do not disclose any non-public personal information about any shareholder or former shareholder of the Fund without the shareholder's authorization, except as required by law or in response to inquiries from governmental authorities. We restrict access to your personal and account information to those employees who need to know that information to provide products and services to you. We also may disclose that information to unaffiliated third parties (such as to brokers or custodians) only as permitted by law and only as needed for us to provide agreed services to you. We maintain physical, electronic and procedural safeguards to guard your non-public personal information.

If you hold shares of the Fund through a financial intermediary, such as a broker-dealer, bank, or trust company, the privacy policy of your financial intermediary governs how your non-public personal information would be shared with nonaffiliated third parties.
