

Brandes Emerging Markets Value Fund

A sub-fund of Brandes Investment Funds Plc

FUND OBJECTIVE

Long-term capital appreciation by investing in equity and equity related securities of issuers located or active mainly in emerging markets whose equity market capitalizations exceed \$3 billion at the time of purchase. Suitable for retail investors with a long-term investment horizon (5 years or more) who can tolerate high levels of volatility and the risk of significant capital loss.

The sub-fund is considered to be actively managed in reference to the MSCI Emerging Markets Index by virtue of the fact that it uses the MSCI Emerging Markets Index for performance comparison purposes.

MORNINGSTAR STYLE BOX™

The Morningstar Style Box™ reveals a fund's investment strategy by showing its investment style and market capitalization based on the fund's portfolio holdings.

The Brandes Emerging Markets Value Fund (the “Fund”) Class I USD returned 10.16%, underperforming its index, the MSCI Emerging Markets Index, which returned 24.05% in the quarter.

Positive Contributors

The technology sector was the primary driver of emerging markets equity returns (MSCI EM) in the quarter as enthusiasm surrounding AI fuelled strong performance among semiconductors and technology hardware companies viewed as key beneficiaries of the massive hyperscale data centre spending. Against this backdrop, several of our technology holdings were among the Fund’s strongest contributors, including South Korean memory companies SK hynix and Samsung Electronics, as well as Taiwanese AI server firm Wiwynn and semiconductor foundry Taiwan Semiconductor Manufacturing Company (TSMC).

Telecom holdings also performed well, led by Millicom International Cellular and Magyar Telekom. Millicom, which operates entirely in Latin America, continued to improve margins in its core operations while enhancing profitability of newly acquired businesses in Uruguay and Ecuador. The company also further consolidated its Colombian operations, which we believe should help it strengthen free-cash-flow generation going forward. Meanwhile, Hungary’s Magyar Telekom raised its financial guidance for the remainder of 2026, citing benefits from infrastructure expansion and greater operational visibility following the renewal of a key mobile spectrum license.

Other notable contributors included Panamanian airline Copa Holdings, Chinese video game developer NetEase, and select bank holdings such as Panama’s Bladex, Austria’s Erste Group, and Georgia’s TBC Bank.

Furthermore, our underweight positions in India and China aided returns relative to the index.

Performance Detractors

While TSMC, SK hynix, and Samsung Electronics were the Fund’s strongest performers, our underweights to TSMC and SK hynix were among the largest detractors from relative returns. For context, TSMC, SK hynix, and Samsung Electronics accounted for 31% of the index and generated more than 63% of its return during the quarter, reflecting the narrow concentration of market return leadership. Their outsized influence also largely explains the primary drivers of our underperformance from a sector and country perspective, namely our underweight to the technology sector overall, as well as our lower allocations to South Korea and Taiwan. Samsung Electronics and SK hynix comprised more than two-thirds of the index’s South Korea exposure, while TSMC represented 55% of its Taiwan weight.

Implications of the war in Iran, specifically as it pertains to oil supply and energy prices, continued to weigh on holdings in the Philippines and Indonesia, both of which are net oil importers. Indonesian equities are significantly out of favour, pressured by currency weakness, government policy uncertainty, and the possibility of a reclassification to frontier-market status by MSCI, although the index provider postponed its review until November. Despite these concerns, we believe the underlying fundamentals of our holdings in both countries remain resilient.

As in the first quarter, businesses perceived to be vulnerable to potential AI disruption hurt performance, most notably IT services firm Globant and online travel platform Trip.com. Additionally, Chinese retailer Alibaba continued to face a challenging operating environment amid weak consumer demand and increasing capital expenditures, while Brazilian integrated oil company Petrobras gave back some of its strong first-quarter gains as oil prices declined.

Select Activity in the Quarter

We initiated a position in Saudi National Bank, and Nien Made Enterprise a Taiwan-based manufacturer and distributor of window coverings. We exited positions in Brazilian retailer Sendas Distribuidora, and Chinese logistics firm ZTO Express. Additionally, we reduced exposure to several technology holdings that performed exceptionally well in the quarter, including the full sell of Hong Kong-based semiconductor equipment company ASMP.

Saudi National Bank (SNB) is the largest bank in Saudi Arabia by assets, loans, and deposits, with roughly 23% domestic market share in both loans and deposits. It was formed in 2021 through the merger of National Commercial Bank (NCB) and Samba Financial Group, combining NCB's retail strength with Samba's corporate and wholesale banking capabilities. Today, SNB operates as Saudi Arabia's national banking champion across retail banking, wholesale banking, capital markets, and international banking. Its largest shareholder is the Public Investment Fund, Saudi Arabia's sovereign wealth fund, which owns roughly 37% of the bank. This links SNB closely to Vision 2030, Saudi Arabia's long-term economic reform plan to diversify the economy away from oil by investing in infrastructure, housing, tourism, technology, sports, and private-sector development.

Investor concerns over government influence, the bank's losses related to its Credit Suisse investment in 2022, and integration challenges following the merger have weighed on SNB's valuation. However, we believe the market is overlooking the progress that SNB has made in the past few years and undervaluing its long-term potential, providing us with what we consider an attractive entry for investment.

Our investment thesis for SNB centres on its dominant franchise, improving execution, and a valuation that appears compelling relative to normalised earnings power. In our view, Saudi Arabia represents a structurally attractive and growing banking market, thanks to favourable demographics, government-led investment, rising homeownership, and efforts to expand the non-oil economy. Following a challenging post-merger integration period, management has improved asset quality, reduced exposure to weaker areas such as construction, and refocused growth toward mortgages, small/mid-sized enterprises, wholesale banking, and fee-generating businesses.

Financially, SNB benefits from scale, a strong low-cost deposit base, high digital adoption, disciplined expenses, and improved credit quality. Funding pressure remains a key watchpoint because Saudi Arabia's loan growth has outpaced its deposit growth, increasing reliance on more expensive wholesale funding. However, at the current share price, we believe the risk is more than accounted for and SNB represents an appealing value opportunity.

Year-to-Date Briefing

The Fund rose 19.28% year-to-date through 30 June 2026, underperforming its index, the MSCI Emerging Markets Index, which appreciated 23.85%.

Performance drivers were largely consistent with those for the second quarter. Samsung Electronics, SK hynix, and TSMC were the Fund's strongest performers, although our underweights to TSMC and SK hynix were among the largest detractors from relative returns. Telecom services providers Millicom International Cellular and Magyar Telekom were notable contributors as well, along with Panamanian businesses Bladex and Copa Holdings, and Brazil's Petrobras. In addition, our underweight positions in India and China helped performance relative to the index.

On the other hand, several holdings in China hurt returns, most notably Alibaba, Trip.com, and BYD Electronic. Other detractors included IT services company Globant, Indonesia-based Bank Rakyat Indonesia and Telkom Indonesia, and Bank of the Philippine Islands.

Current Positioning

The emerging markets (EM) investment universe has evolved meaningfully over the past two decades. Once dominated by financials, energy, and materials, emerging markets now sit at the centre of the global AI buildout. Many AI infrastructure-enabling businesses, from semiconductor manufacturing to memory and hardware, are based in EM and have benefited from rising demand tied to data centre expansion and increasing computing intensity. This shift is reflected in the index composition and the underlying return drivers. Technology now represents 45% of the MSCI EM Index (as of 30 June), up from less than 30% at the start of the year and exceeding the sector weight within the MSCI USA Index (37% as of 30 June). The stock-level concentration is also at a historic extreme, with the three largest companies (TSMC, Samsung Electronics, and SK hynix) now accounting for 31% of the index. As a result, Taiwan and South Korea, where these three companies, along with other technology firms, reside, have overtaken China as the index's largest country exposures, while China's weight has fallen below 20% for the first time since 2014.

Although we are allocated to AI beneficiaries such as SK hynix, TSMC, and Samsung Electronics, we have also identified value opportunities in areas perceived to be disrupted by AI, including IT services and online travel agencies. Consistent with our value-oriented approach, we remain mindful of valuations and cyclical risks, particularly where expectations appear elevated or demand outcomes remain uncertain. As of 30 June, our technology holdings represented 23% of the Fund, making it our largest sector allocation after financials, but also our largest underweight relative to the index. That underweight widened during the quarter as we trimmed select strong performers, while the index's technology weight continued to increase mechanically alongside rising share prices, irrespective of valuation.

Outside technology, we continue to find compelling value in communication services, consumer staples, and financials, where our allocation increased with the purchase of Saudi National Bank and we added to AIA Group. By contrast, the materials sector remains an area where we have not been finding a lot of undervalued opportunities.

Geographically, we maintain meaningful exposure to businesses in Latin America, with diversified investments in telecommunications, energy, and real estate. Our allocations to India increased in the quarter, but we remain underweight to both India and China, even as the index's respective weights decreased. Additionally, our underweights to technology-heavy South Korea and Taiwan materially widened as they became larger portions of the index.

In our view, the dynamic investing landscape of emerging markets underscores the importance of a selective, valuation-driven approach. While index returns were concentrated in a small number of companies and sectors, we continue to find attractive opportunities across a broader opportunity set and remain encouraged by the risk-reward profile of our diverse holdings.

¹Based on the actual expenses over the trailing twelve month period ended 6/30/2026. ²Out of 3072 Global Emerging Markets Equity funds as of 6/30/2026.

Class I Shares will generally be offered to institutional investors only, as determined by the fund's directors in their absolute discretion. The minimum initial subscription applicable to Class I Shares is \$1 million or its equivalent in another currency, save for Class I Shares with a GBP denominated currency for which there is a minimum initial subscription of £10,000.

Class A Shares may be offered by appointed distributors only. The minimum initial subscription applicable to A Shares is \$10,000 or its equivalent in another currency. A distribution fee of up to 1% of the net asset value of the relevant Class A Shares shall be payable out of the assets of the share class to the distributors.

Class I1 and A1 Shares are distributing share classes. Distributions are paid on an annual basis with the record date being the last business day of the calendar year.

This Fund promotes environmental and/or social characteristics and is classified as an Article 8 fund under the EU's Sustainable Finance Disclosure Regulation ("SFDR").

Additional Information for French investors: *Investors should note that, relative to the expectations of the Autorité des Marchés Financiers, this UCITS presents disproportionate communication on the consideration of non-financial criteria in its investment policy.*

Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Past performance is no guarantee of future results. For more detailed information about Morningstar's Analyst Rating, including its methodology, please go to global.morningstar.com/managerdisclosures/. The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. Brandes Emerging Markets Value Fund was rated against the following numbers of Global Emerging Markets Equity funds over the following time periods: 3072 funds in the last three years, and 2673 funds in the last five years, and 1501 funds in the last ten years.

This report is produced by the manager for marketing purposes only and does not constitute an offer or solicitation to subscribe for shares in Brandes Investment Funds plc (the "Company"). For more information on the risks associated with the Fund, please refer to the section entitled Risk Factors in the main body of the prospectus and the Fund's supplement to the prospectus. Full details regarding the Fund are set out in the key information document for packaged retail and insurance-based investment products (the "PRIIPs KID") or, for UK investors, the key investor information document (the "UCITS KIID"), the prospectus, the articles of association and the latest financial reports published for the Company (collectively the "Fund Documents"). Before any subscription, it is recommended that you read carefully the Fund Documents. The information provided in this material should not be considered a recommendation to purchase or sell any particular security. Income may fluctuate in accordance with market conditions and taxation arrangements. Investment in the Fund described in this report carries a substantial degree of risk and places your capital at risk. The price and value of investments can go down as well as up. Your investment may be subject to a redemption fee. You may not get back the original amount invested and you may lose all of your investment. Strategies discussed are subject to change at any time by the manager in its discretion due to market conditions or opportunities. The foregoing reflects the thoughts and opinions of Brandes Investment Partners® exclusively and is subject to change without notice.

The Fund Documents may be obtained without cost by contacting the Administrator for the Fund, your Financial Representative, or at the offices of the paying agent or representative in each jurisdiction. Austria, Belgium, France, Germany, Luxembourg, Netherlands, Sweden and the United Kingdom: FE fundinfo (Luxembourg) S.à.r.l., 6 Boulevard des Lumières, Belvaux, 4369 Luxembourg. Spain: Alfunds Bank, S.A., Estafeta 6, la Moraleja, Complejo Plaza de la Fuente, Alcobendas, Madrid, Spain. Switzerland: Representative and Paying Agent: BNP Paribas Securities Services, Paris, succursale de Zurich, Selnaustrasse 16, CH-8002 Zurich, Switzerland. Please note that not all share classes are available in each of the foregoing jurisdictions listed above. All official documentation is also available at www.brandes.com. This report may not be used in any jurisdiction except under circumstances that will result in compliance with any applicable laws and regulations. The fund is not offered or sold to "U.S. Persons" as defined in Regulation S of the U.S. Securities Act of 1933. This report is reserved for professional clients as defined by the European Directive 2004/39/EC dated 21 April 2004 (MiFID) and is not for retail distribution. Brandes Investment Partners (Europe) Limited is regulated by the Central Bank of Ireland and is registered in Ireland at the below address. Registration number 510203.

Brandes Investment Funds plc has not been registered under the United States Investment Company Act of 1940, as amended, nor the United States Securities Act of 1933, as amended (1933 Act). No shares may be offered or sold, directly or indirectly in the United States or to any U.S. person unless the securities are registered under the 1933 Act, or an exemption from the registration requirements of the 1933 Act is available. A "U.S. person" is defined as (a) any individual who is a citizen or resident of the United States for federal income tax purposes; (b) a corporation, partnership or other entity created or organized under the laws of or existing in the United States; (c) an estate or trust the income of which is subject to United States federal income tax regardless of whether such income is effectively connected with a United States trade or business. In the United States, this material may be distributed only to a person who is a "distributor," or who is not a "U.S. person," as defined by Regulation S under the U.S. Securities Act of 1933 (as amended).
