

Brandes Global Value Fund

A sub-fund of Brandes Investment Funds Plc

FUND OBJECTIVE

Long-term capital appreciation by investing primarily in global equity securities of issuers listed or traded on Recognised Exchanges whose equity market capitalizations exceed \$5 billion at the time of purchase. Suitable for retail investors with a long-term investment horizon (5 years or more) who can tolerate high levels of volatility and the risk of significant capital loss.

The sub-fund is considered to be actively managed in reference to the MSCI World Index by virtue of the fact that it uses the MSCI World Index for performance comparison purposes.

The Brandes Global Value Fund (the “Fund”) Class I USD declined 0.48%, outperforming its index, the MSCI World Index, which fell 3.57% in the quarter, and underperforming the MSCI World Value Index, which rose 1.18%.

Positive Contributors

The energy sector rose significantly amid the geopolitical conflict in the Middle East, and our slight overweight, along with our stock selection, aided relative returns. Apart from energy, notable contributors included several holdings in emerging markets and pharmaceuticals, as well as businesses favourably tied to AI-related demand. Additionally, our underweight to information technology, particularly software, aided relative performance.

All three of our energy sector holdings rose substantially during the period on the back of rising oil and natural gas prices. France-based integrated energy company TotalEnergies was the largest contributor to returns, while U.S.- based oilfield services company Halliburton and U.K -based Shell also rose.

Emerging market technology holdings also contributed significantly, led by South Korea-based technology hardware and semiconductor company Samsung Electronics and Taiwan-based Taiwan Semiconductor Manufacturing Company. Both stocks rose as they continued to benefit from significant artificial intelligence (AI) demand-driven spending, including the increasing need for memory semiconductors as well as leading edge semiconductor chips.

The supply disruption of many materials and chemicals coming from the Middle East led to increases in the price of many chemicals and U.S.-based materials and housing products company Westlake was another top contributor.

Pharmaceuticals were the strongest contributing industry, led by GSK (based in the U.K.), Takeda (based in Japan) and U.S.-based pharmaceutical companies Merck and Pfizer.

Performance Detractors

The most significant detractors during the quarter came from select technology-related holdings, particularly software and IT services, where share prices pulled back sharply amid heightened concerns around AI-driven disruption and broader risk-off sentiment. While this weakness detracted at the individual holding level, the Fund’s underweight to the sector helped mitigate the overall impact.

Germany-based software company SAP declined, reflecting broader concerns around enterprise software vendors facing increased competition and questions around how quickly AI-driven innovation might translate into incremental revenue growth. Despite these concerns, SAP continued to benefit from a deeply embedded customer base and long-term secular demand for enterprise resource planning solutions. We used the share price decline as an opportunity to add to our position.

Several of our IT service holdings declined, led by France-based IT services company Capgemini, U.S.-based EPAM Systems, and Cognizant Technology Solutions. These declines were consistent with broad weakness across IT services as investors reassessed how generative AI might affect traditional consulting and application development models.

MORNINGSTAR STYLE BOX™

The Morningstar Style Box™ reveals a fund’s investment strategy by showing its investment style and market capitalization based on the fund’s portfolio holdings.

Past performance may not be a reliable guide to future performance. Your capital is at risk.

All three companies have been investing in higher-value digital offerings and their services remain deeply embedded in the operations of large enterprise clients, while market sentiment during the quarter reflected worries that AI-driven automation could compress pricing and dampen discretionary IT spending.

Taiwan-based server and datacentre hardware company Wiyynn detracted, as volatility in AI-related infrastructure spending expectations weighed on sentiment.

Ireland-based contract research organisation ICON was another significant detractor. During the quarter, the company disclosed an internal investigation into accounting practices that could result in previously reported revenue being overstated by less than 2%. This increased investor uncertainty and led to pressure on the share price.

Select Activity in the Quarter

During the quarter, we initiated a position in France-based Sodexo, a global leader in food services and facilities management. Sodexo provides outsourced services to corporate, education, health care, and government clients in more than 40 countries, with a business model anchored by long-term contracts and high renewal rates. The company generates the majority of its revenue from onsite services, including contract catering and facilities management, where scale advantages and operational complexity create meaningful barriers to entry.

Sodexo has fallen out of favour after several years of operational challenges, including labour cost inflation, inconsistent execution across regions, and investor scepticism following the spin-off of its employee benefits business. In North America, the company has underperformed peers, which further weighed on the shares.

In our view, this pessimism has created an opportunity to invest in what we consider a well-positioned, cash-generative business at a valuation that does not reflect its long-term earnings power. We believe the market is underestimating Sodexo's ability to pass through cost inflation over time, improve margins through operational initiatives, and benefit from secular outsourcing trends across corporate and institutional customers. In our view, the company's global scale, diversified end markets, and recurring revenue profile should provide resilience across economic cycles.

At current valuation levels, Sodexo trades at a meaningful discount to our estimate of intrinsic value. We see an attractive margin of safety, supported by strong returns on capital, a solid balance sheet, and the potential for earnings recovery as execution improves.

We exited our position in U.S.-based health care distributor Cardinal Health during the quarter after the share price rose

to our estimate of intrinsic value following a strong period of performance.

We first invested in Cardinal Health more than eight years ago. Its industry at that point had consolidated significantly, leaving U.S. prescription drug distribution dominated by a small number of large players. At the time of our initial investment, we believed the market was underappreciating the durability of Cardinal Health's cashflow profile, its scale advantages, and the potential for improved profitability through better execution and portfolio focus, particularly within its higher margin medical products and services businesses.

Over our holding period, the investment case evolved as industry headwinds and idiosyncratic risks were repeatedly incorporated into the valuation. These issues included prolonged uncertainty around opioid litigation, which we monitored closely through various settlement scenarios, as well as competitive concerns related to Amazon's entry into the pharmacy business. While these risks were meaningful, we believed they were manageable and increasingly reflected in the share price over time.

In more recent years, Cardinal Health's fundamentals improved, and investor sentiment shifted. The company demonstrated strong cash generation, continued to return capital to shareholders, and pursued targeted acquisitions in specialty and at-home medical supply services. As execution improved and uncertainty diminished, the market re-rated the shares. With this strong performance, the stock price was approaching our estimate of intrinsic value, so we elected to divest the position and redeploy capital into opportunities where we see a more compelling margin of safety.

Current Positioning

As of 31 March 2026, the Fund remains meaningfully differentiated from the index. Relative to the MSCI World Index, we maintained an overweight to consumer staples and health care and a substantial underweight to information technology, particularly software and semiconductors.

The quarter was marked by a sharp selloff across software and IT services as markets reassessed how artificial intelligence may disrupt traditional business models and industry economics. While we recognise that AI will be disruptive over time, we believe part of the recent selloff reflected broad risk reduction and valuation compression rather than uniform deterioration in near-term fundamentals. During the volatility, we added selectively to companies where we believe long-term competitive advantages remain intact.

Geographically, we hold overweight positions in the United Kingdom, France and emerging markets, while remaining underweight in the United States and Japan. We believe the

differences between the Fund and the MSCI World Index make it an excellent complement and diversifier to passive and growth-oriented strategies.

Global value stocks continued to trade within the least expensive quartile relative to growth stocks (MSCI World Value vs. MSCI World Growth) since these style indices began. This is evident across various valuation measures, including price/earnings, price/cashflow and enterprise value/sales. Historically, such discount levels often signalled attractive subsequent relative returns for value stocks during subsequent periods. This is encouraging because the Fund, guided by our value philosophy and process, has had the tendency to do better than the value index when that index exceeded the broad index.

Looking ahead, we are excited about the long-term prospects of companies held by the Fund, which in aggregate trade at more compelling valuation levels than the index, in our opinion.

¹Based on the actual expenses over the trailing twelve month period ended 3/31/2026. ²Out of 596 Global Large-Cap Value Equity funds as of 3/31/2026.

Class I Shares will generally be offered to institutional investors only, as determined by the fund's directors in their absolute discretion. The minimum initial subscription applicable to Class I Shares is \$1 million or its equivalent in another currency, save for Class I Shares with a GBP denominated currency for which there is a minimum initial subscription of £10,000.

Class A Shares may be offered by appointed distributors only. The minimum initial subscription applicable to A Shares is \$10,000 or its equivalent in another currency. A distribution fee of up to 1% of the net asset value of the relevant Class A Shares shall be payable out of the assets of the share class to the distributors.

Class I1 and A1 Shares are distributing share classes. Distributions are paid on an annual basis with the record date being the last business day of the calendar year.

This Fund promotes environmental and/or social characteristics and is classified as an Article 8 fund under the EU's Sustainable Finance Disclosure Regulation ("SFDR").

Additional Information for French investors: *Investors should note that, relative to the expectations of the Autorité des Marchés Financiers, this UCITS presents disproportionate communication on the consideration of non-financial criteria in its investment policy.*

MSCI has not approved, reviewed or produced this report, makes no express or implied warranties or representations and is not liable whatsoever for any data in the report. You may not redistribute the MSCI data or use it as a basis for other indices or investment products. ©2026 Morningstar, Inc. All rights reserved. The information contained herein: (1) is proprietary to Morningstar and/or its content providers; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete, or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Past performance is no guarantee of future results. The Morningstar Rating™ for funds, or “star rating”, is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product’s monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. Brandes Global Value Fund was rated against the following numbers of Global Large-Cap Value Equity funds over the following time periods: 596 funds in the last three years, and 462 funds in the last five years, and 339 funds in the last ten years.

This report is produced by the manager for marketing purposes only and does not constitute an offer or solicitation to subscribe for shares in Brandes Investment Funds plc (the “Company”). For more information on the risks associated with the Fund, please refer to the section entitled Risk Factors in the main body of the prospectus and the Fund’s supplement to the prospectus. Full details regarding the Fund are set out in the key information document for packaged retail and insurance-based investment products (the “PRIIPs KID”) or, for UK investors, the key investor information document (the “UCITS KIID”), the prospectus, the articles of association and the latest financial reports published for the Company (collectively the “Fund Documents”). Before any subscription, it is recommended that you read carefully the Fund Documents. The information provided in this material should not be considered a recommendation to purchase or sell any particular security. Income may fluctuate in accordance with market conditions and taxation arrangements. Investment in the Fund described in this report carries a substantial degree of risk and places your capital at risk. The price and value of investments can go down as well as up. Your investment may be subject to a redemption fee. You may not get back the original amount invested and you may lose all of your investment. Strategies discussed are subject to change at any time by the manager in its discretion due to market conditions or opportunities. The foregoing reflects the thoughts and opinions of Brandes Investment Partners® exclusively and is subject to change without notice.

The Fund Documents may be obtained without cost by contacting the Administrator for the Fund, your Financial Representative, or at the offices of the paying agent or representative in each jurisdiction. Austria, Belgium, France, Germany, Luxembourg, Netherlands, Sweden and the United Kingdom: FE fundinfo (Luxembourg) S.à.r.l., 6 Boulevard des Lumières, Belvaux, 4369 Luxembourg. Spain: Alfunds Bank, S.A., Estafeta 6, la Moraleja, Complejo Plaza de la Fuente, Alcobendas, Madrid, Spain. Switzerland: Representative and Paying Agent: BNP Paribas Securities Services, Paris, succursale de Zurich, Selnaustrasse 16, CH-8002 Zurich, Switzerland. Please note that not all share classes are available in each of the foregoing jurisdictions listed above. All official documentation is also available at www.brandes.com. This report may not be used in any jurisdiction except under circumstances that will result in compliance with any applicable laws and regulations. The fund is not offered or sold to “U.S. Persons” as defined in Regulation S of the U.S. Securities Act of 1933. This report is reserved for professional clients as defined by the European Directive 2004/39/EC dated 21 April 2004 (MiFID) and is not for retail distribution. Brandes Investment Partners (Europe) Limited is regulated by the Central Bank of Ireland and is registered in Ireland at the below address. Registration number 510203.

Brandes Investment Funds plc has not been registered under the United States Investment Company Act of 1940, as amended, nor the United States Securities Act of 1933, as amended (1933 Act). No shares may be offered or sold, directly or indirectly in the United States or to any U.S. person unless the securities are registered under the 1933 Act, or an exemption from the registration requirements of the 1933 Act is available. A “U.S. person” is defined as (a) any individual who is a citizen or resident of the United States for federal income tax purposes; (b) a corporation, partnership or other entity created or organized under the laws of or existing in the United States; (c) an estate or trust the income of which is subject to United States federal income tax regardless of whether such income is effectively connected with a United States trade or business. In the United States, this material may be distributed only to a person who is a “distributor,” or who is not a “U.S. person,” as defined by Regulation S under the U.S. Securities Act of 1933 (as amended).
