What is this product?

Type:

This product is a UCITS sub-fund of an open-ended umbrella investment company with variable capital and segregated liability between sub-funds. The Sub-Fund's assets are held through its Depositary, which is State Street Fund Services (Ireland) Limited. Further information in relation to the Sub-Fund should be obtained from your financial advisor or distributor or is available at <https://www.brandes.com/ucits> in English.

Objective:

- The investment objective of the Sub-Fund is to seek long-term capital appreciation.
- The Sub-Fund is considered to be actively managed in reference to the Russell 1000® Value Index. Certain of the Sub-Fund's securities may be components of and may have similar weightings to the Russell 1000® Value Index. However, the Sub-Fund may deviate significantly from the Russell 1000® Value Index and the Manager may use its discretion to invest in industries not included in the Russell 1000® Value Index. In addition, the Sub-Fund is considered to be actively managed in reference to the Russell 1000® Index (the "Index") by virtue of the fact that it uses the Index for performance comparison purposes. However, the Index is not used to define the portfolio composition of the Sub-Fund or as a performance target and the Sub-Fund may be wholly invested in securities which are not constituents of the Index.
- The Sub-Fund expects to be invested in approximately 35-85 issues. Typically, no more than 5% of the value of the Sub-Fund's total assets will be invested in any one security, at the time of purchase. With respect to the Sub-Fund's investments in any particular country or industry, the Sub-Fund may typically invest up to the greater of either (a) 20% of total assets in any particular country or industry at the time of purchase, or (b) 150% of the weighting of such country or industry as represented in the Index, at the time of purchase.
- The Sub-Fund primarily invests in equity and equity related securities of issuers located or active mainly in the United States.
- The investment focus will be on companies whose market capitalisations is greater than USD 5 billion at the time of purchase. At least two thirds of the investments of the Sub-Fund (in terms of total assets) shall be made in equity securities of issuers located or active mainly in the United States ("U.S. Equities").
- The Manager's approach to selecting investments for the Sub-Fund is oriented to individual stock selection rather than on a top-down basis or macro-economic outlook. Securities are selected based on the Manager's assessment of long-term business worth compared to current value. Exposures to countries, sectors, and industries are a residual of this bottom up stock selection process.

- This Sub-Fund promotes environmental and/or social characteristics and is classified as an Article 8 fund under the EU's Sustainable Finance Disclosure Regulation ("SFDR").
- The Sub-Fund seeks to promote environmental and social characteristics through its exclusion screening process and consideration of principal adverse impacts on its investment decisions. In addition, the Sub-Fund monitors the Weighted Average Carbon Intensity ("WACI") at the portfolio level, relative to its Index. The Sub-Fund aims to maintain a WACI that is lower than the WACI of the Index on annual basis.
- The Manager can make investments for the Sub-Fund at its own discretion within the predefined investment limits.
- The Sub-Fund may invest no more than 10% of its net assets in other investment funds.
- This Sub-Fund can use derivatives, including forward foreign exchange contracts, futures, options and swaps, for investment purpose and to manage the portfolio efficiently.
- This is a distributing share class – a dividend will be paid annually.
- Portfolio transaction costs are paid out of the assets of the Sub-Fund.
- The Sub-Fund employs a long-term investment approach and a holding period of at least 5 years is suggested.

What happens if Brandes Investment Partners (Europe) Limited is unable to pay out?

You may face a financial loss should the manufacturer default on their obligations, there is no compensation or guarantee scheme in place which may offset, all or any of, this loss. The assets of the Sub-Fund are held with its Depositary, State Street Fund Services (Ireland) Limited, which is a separate company. Should the Sub-Fund default, the Depositary would liquidate the investments and distribute the proceeds to the investors. In the worst case, however, you could lose your entire investment.
